Focuslight Overview

- Founded in 2007 by Dr. Victor X. Liu, headquartered in Xi'an, China.
- A fast-growing company that develops and manufactures:
 - **Laser sources and materials** (Photon Generation)
 - **Optical components** (Photon Control)
 - **Photonics module and system solutions** (Application Solutions) focusing on **optical communication, consumer electronics, and pan-semiconductor applications.**
- A **global photonics foundry** offering process development and manufacturing services to the global photonics community.
- Publicly listed in the Shanghai Stock Exchange (Ticker Symbol: 688167).

Milestones

2007

Founding of Focuslight

2018

Dongguan delivery and high-volume manufacturing center officially in operation

LIMO

Lissotschenko Mikrooptik

2017

Acquisition of LIMO;
Started providing photon control and photonics application solutions

IPO

2021

Successful IPO at Shanghai Stock Market

FOCUSLIGHT
Never stop exploring

2019

Global branding identity upgrade

SUSS + MicroOptics

2024

Acquisition of SUSS MicroOptics

HEPTAGON

2024

Acquisition of ams OSRAM's optical component assets;
Relaunch of Heptagon brand

2024

Shaoguan Base officially in operation

2025

Hefei Base officially in operation

BRIGHTVIEW
TECHNOLOGIES

2026

Announced strategic partnership with BrightView

[← Return](#) Focuslight Technologies Inc. Completes Acquisition of ams OSRAM's Optical Component Assets, Further Strengthening Its Global Competitiveness in Optics Solutions
Time: 2024-09-02

[Download](#)

Xi'an, China, September 2nd, 2024 – – Focuslight Technologies Inc. (Shanghai Stock Exchange: 688167), a global provider of high-power diode lasers and materials, laser optics and photonics modules and system solutions, **today announces the successful acquisition of optical component assets from ams OSRAM AG**. This marks another strategic move and milestone following Focuslight's acquisitions of LIMO GmbH in 2017 and SUSS MicroOptics SA (now as Focuslight Switzerland SA) in January 2024, providing a strong foundation on its commitment to expanding its capabilities and footprint in the global photonics market.

News source: <https://focuslight.com/news-events/newslist/focuslight-technologies-inc-completes-acquisition-of-ams-osrams-optical-component-assets-further-strengthening-its-global-competitiveness-in-optics-solutions/>

Focuslight also plans a full integration of the acquired assets into its existing business structure. The company will reorganize and integrate certain assets into its Automotive Business Unit to strengthen its capabilities in serving global automotive customers. A **Strategic Growth Division** will be established to house the R&D teams and equipment related to consumer electronics, disposable medical solutions, and other emerging applications. All products associated with these assets will be unified under the **Focuslight** brand.

Meanwhile, a **Global Photonics Foundry Business Unit** will be established serving as a global center for photonics industry process development and manufacturing services under the historic **Heptagon** brand, which was originally founded in 1993 and will now continue its legacy of innovation, quality, and high-volume manufacturing under Focuslight's global operations, transforming its customer's ideas and designs into industry-powering photonics solutions.

Story of Heptagon

Established in 1993, Heptagon became a leading brand in the micro-optics industry, renowned for its expertise in advanced optical packaging, wafer-level micro-optical modules, and high-volume manufacturing for consumer electronics.

Now reborn as Heptagon Photonics, we continue this world-class legacy, delivering miniaturized, high-performance, and cost-effective photonics solutions to drive innovation in emerging markets.

Visit www.hptg.com for more information

- 2024 The Heptagon brand is restored after acquisition by Focuslight for its wafer-level-optics-based businesses
- 2017 Acquired by ams
- 2016 2 billion units shipped
- 2015 Entry into 3D and IoT
- 2014 Entry into wearables
- 2013 1 billion (1,000,000,000) units shipped
- 2010 First light WLO solution for leading smartphone OEM
- 2007 Imaging WLO high-volume manufacturing in Singapore
- 2006 First wafer-level CMOS micro-optics solution to leading handset OEM
- 2002 First wafer-level micro-optics solution
- 1993 The company Heptagon was founded

- Summary

Products and Services – Based on WLO and WLS

Under Heptagon Brand

Wafer-Level Optics

Micro lens arrays, diffusers, DOEs,
Fresnel lenses

Wafer-Level Lens Modules

Stacked imaging lens modules
compatible with CMOS

Sensor Module Packaging Service

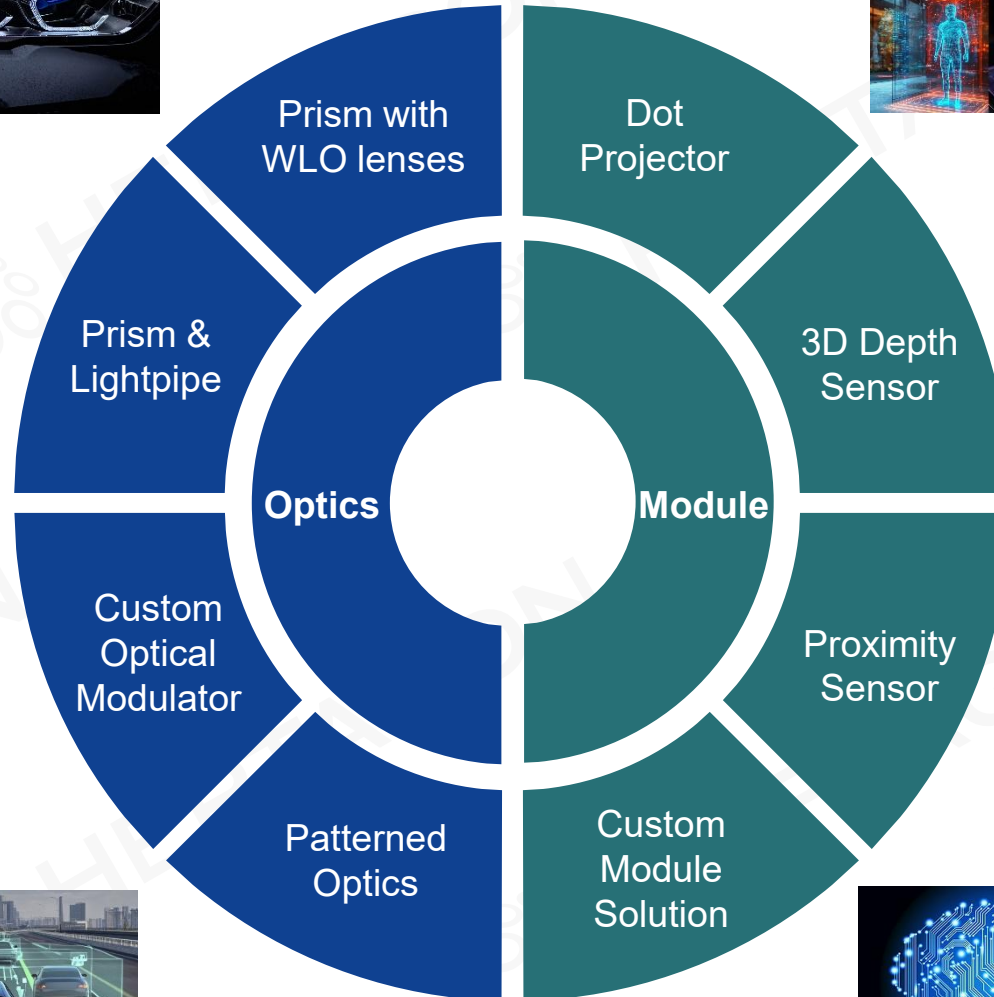

Packaging service for sensor
modules

Semiconductor Foundry Service

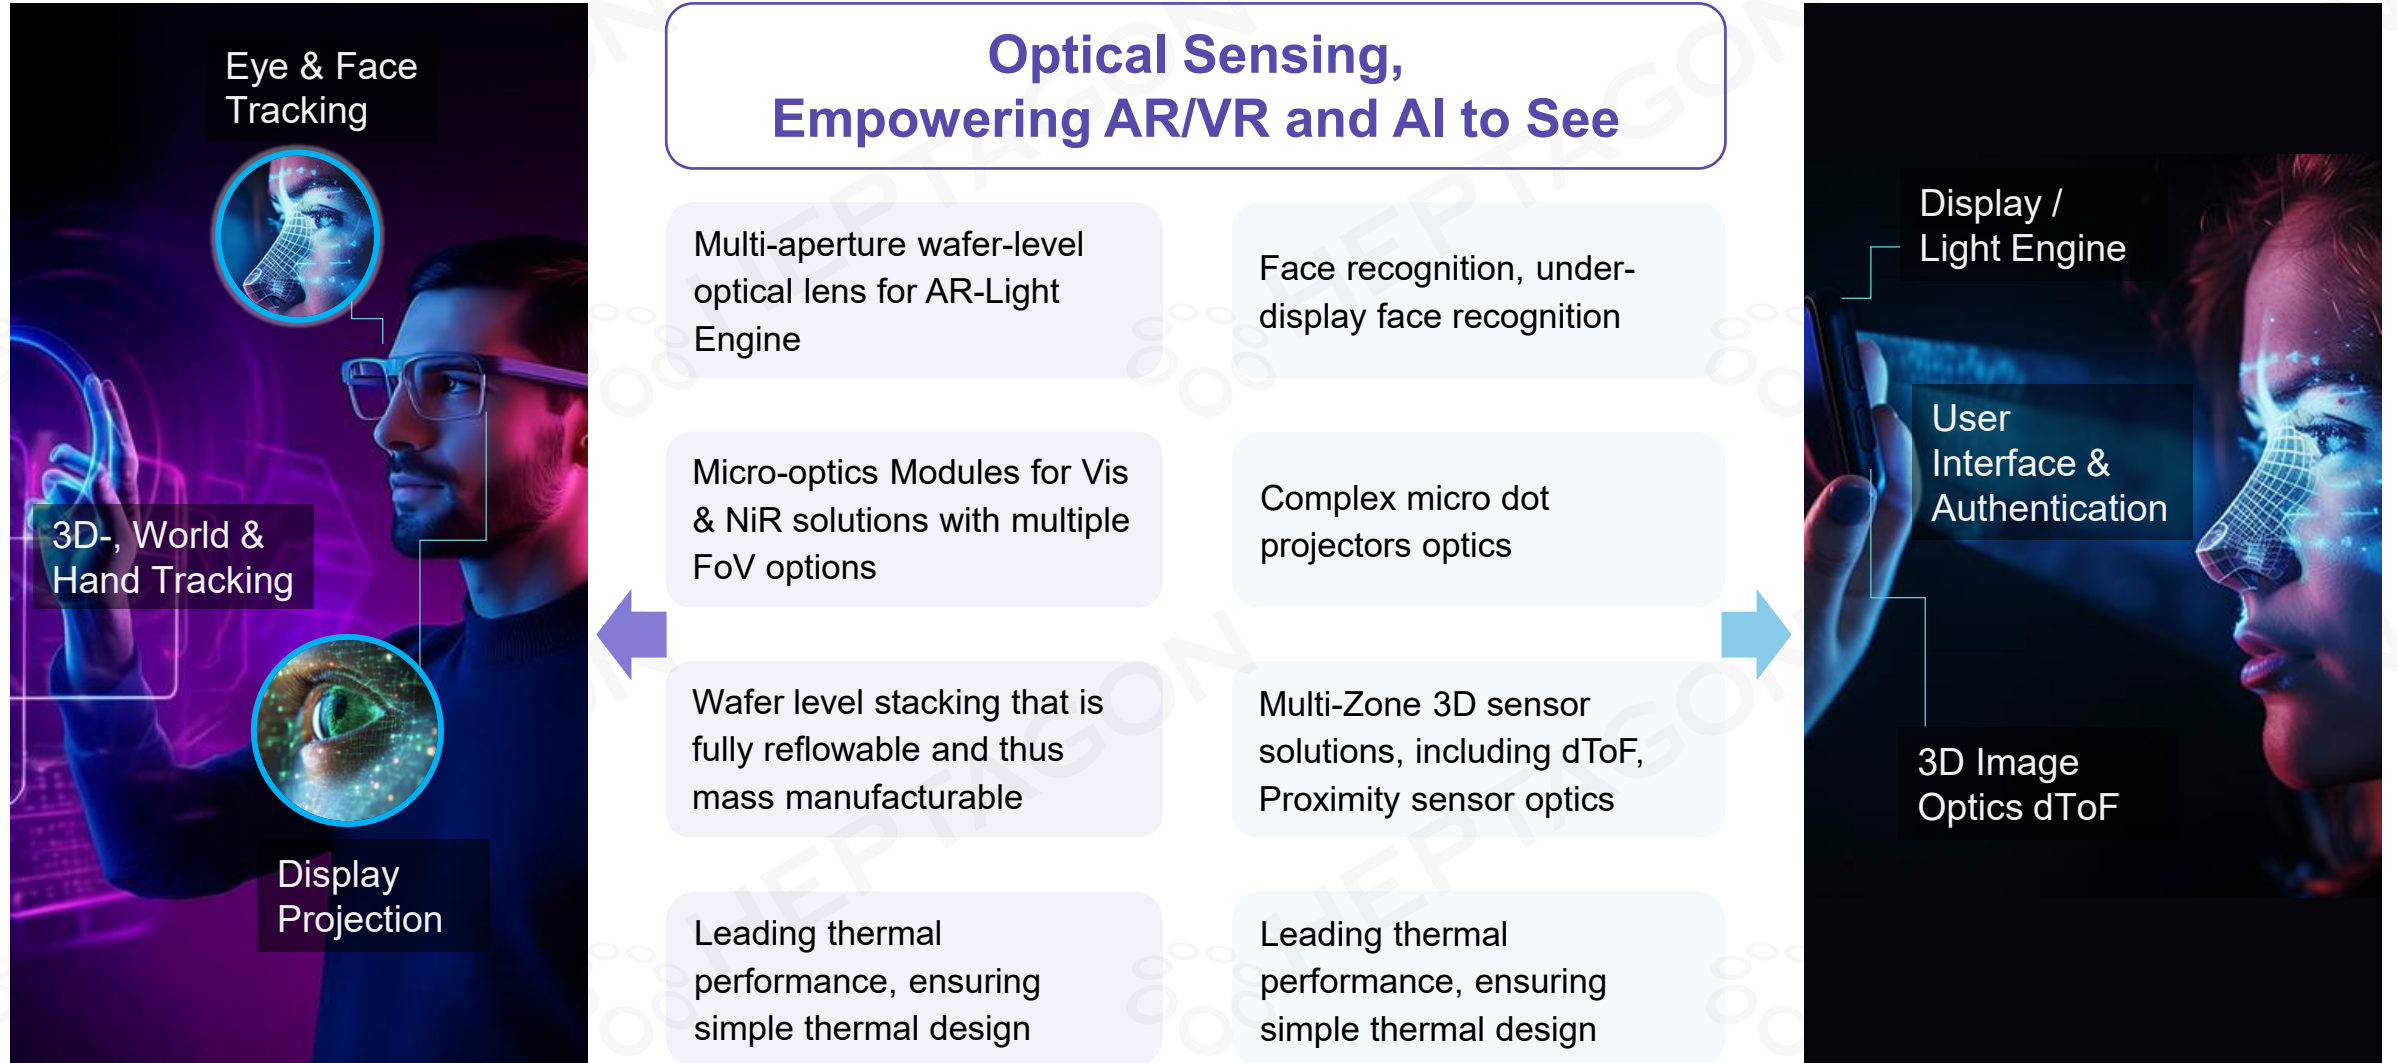

Imprinting of optical components or
lens modules on silicon wafers (e.g.,
for sensors, VCSELs, MicroLEDs)

Wide Application Spectrum of Solutions

Typical Application and Products

Consumer Electronics

Typical Application and Products

Automotive, Robotics, Medical

In-Cabin Sensing

Endoscopy

Tailored Diffusor Micro-Optics

Irregular Micro Lens Arrays for flood illuminators with various FOIs

Pattern-Generating Micro-Optics

MLA-based Projected Lighting System MLA-based molded module

Pattern from a single illuminator

Pattern from a pair of illuminator

Imaging and Projection Micro-Optics

WLO lens & camera integration for chip-on-tip medical endoscopes

Decorative Lighting

Home / Service Robotics

- Summary

Wafer Level Optics – Common Technology Base

Design for Manufacturing by In-House Wafer Level Optics & Stacking Technology

Wafer-Level Optics, Electronics, Packaging, Integration, Testing and Processing

Wafer-level imprinted optics from mm down to nm-scale

WLO
(Wafer Level Optics)

WLO

Encapsulated optics

Diffractive & refractive optics, MLAs, diffusers

WLS
(Wafer Level Stacking)

Folded path

Imaging lenses, projector lenses

WLI
(Wafer Level Integration)

Molded module

Optical sensor & illumination modules

Wafer Level Optics – Basic Manufacturing Process

WLO Competitive Advantages:

- Full wafer-scale process for high volume mass production
- UV curing, Low temperature, low pressure process
- Conformal, microfluidic filling for micro/nano structures
- Conformal reproduction of features less than $1\mu\text{m}$
- Reflowable optical material with high thermal performance

Unique Advantages for High Performance u-Camera:

- Full Solution reflowability, no Compromise of Function, Fit, Cosmetics
- No barrels, mounts, highly compact, highly integrated optical solutions
- Miniaturization (mm^2) flexibility, advanced capabilities, performance
- Concepts to ensure quality mass production volume solutions
- Active Alignment to sensor delivering μWLO +Image Sensor Modules

Reflowable WLO-lens systems enable smallest footprint for μcamera devices and integration

Benefits – Wafer-Level Optics and Stacking

- **Wafer-Level Optics (WLO)** is an extremely high-precise fabrication technology for micro-optics at large volume
 - ✓ Wafer-scale process rapidly scalable for mass production
 - ✓ Tends to be profitable at high volume (MP >100 wafers per production) due to relatively high master & tooling cost
- **Wafer-Level Stacking (WLS)** enables high-performance and highly integrated micro-optical system products
 - ✓ Micron-level precision stacking of multiple optics wafers using leading-edge mask aligners
 - ✓ Wafer-scale bonding using rigid spacers and materials with excellent thermal and mechanical stability
 - ✓ Economic wafer-scale integration of added functions such as apertures, coatings, spectral filters, a.o.

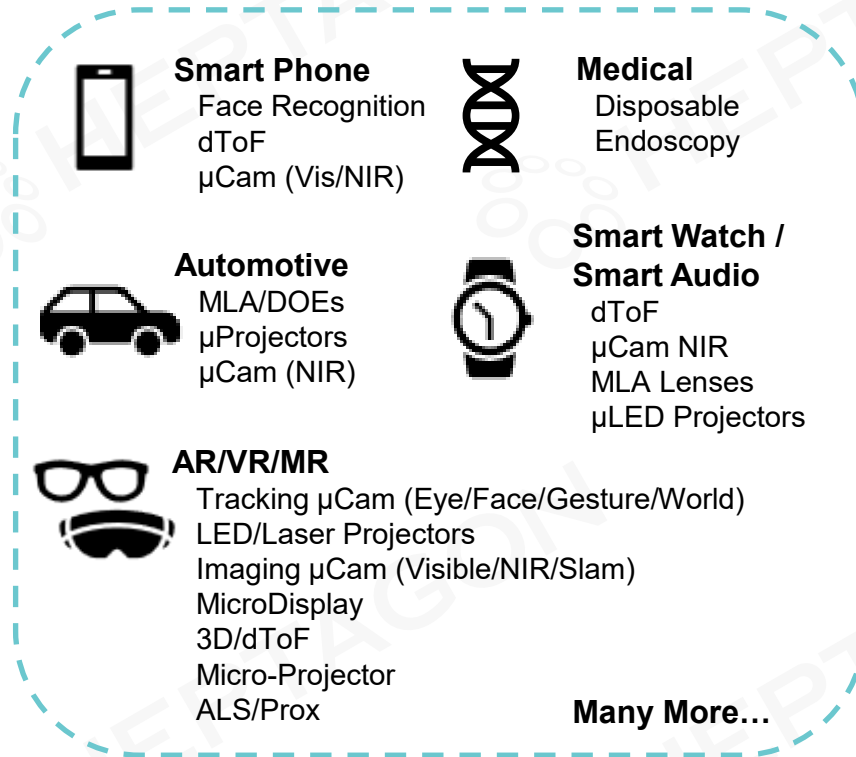

- WLO & WLS benefits can be leveraged best in high-volume markets such as Consumer Electronics, AR/VR & Automotive
- Committed to providing reliable, high-performance WLO products and superior development services to our customers

How WLO Technology Enables Your Applications

Developing Customized Wafer-Level Optics Solutions for our Customers

Customer Concepts, Requirements...
Target Application Spec Sharing

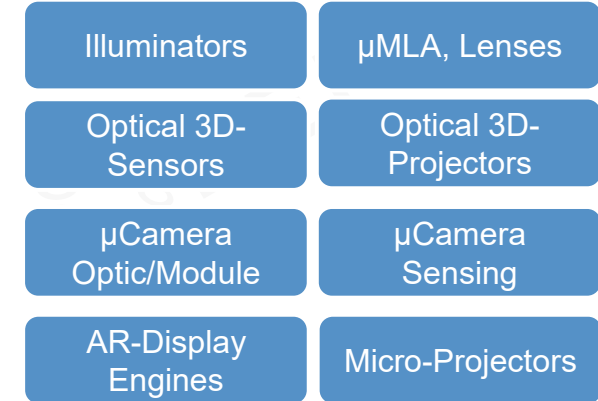

Optical Component
System Level Solutions

Delivering the Optic or Module to Customer,
Semicon or indeed ISP partner

Final Solutions
Module or Application Level

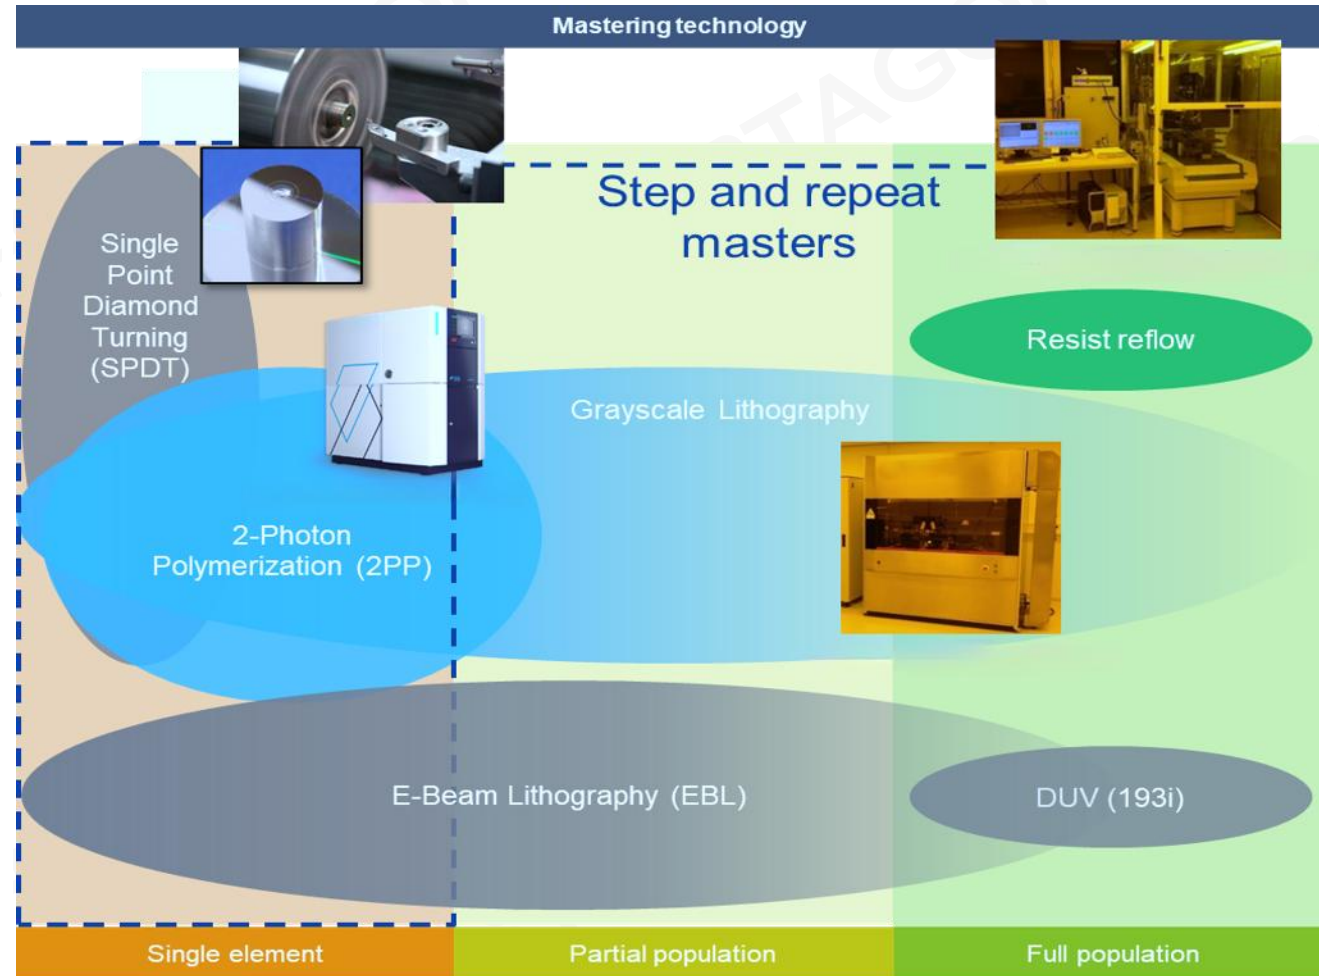

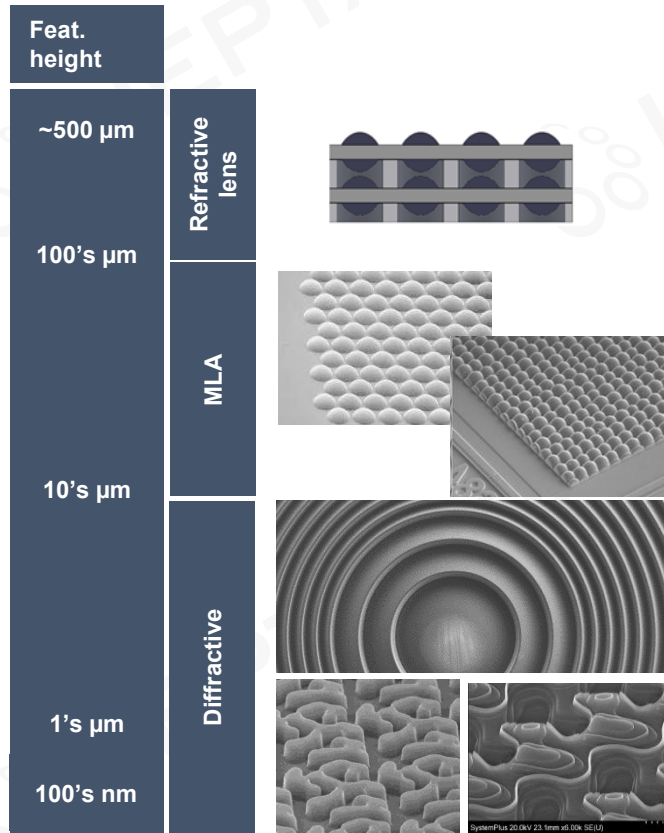

USP for WLO, WLS, WLI

- Outstanding Performance
- Micro Size
- Reflowability
- High Volume Manufacturing

Wafer-Level Optics solutions are generally **customer and application specific**, due to specific targets as well as specific semiconductor light source, μ-display and light detector components

Our Mastering Capabilities – All Starts from Here

Our R&D Lab and Equipment

Ensuring the Optical Performance of Products

Metrology Capabilities

Coordinate Measuring Machine

Contour Measuring Instrument

White Light Interferometer

Confocal Microscope

SEM

Precision Goniometer

Large-diameter horizontal planar & cylindrical interferometer

Full Size Measuring Instrument

Off-Center Measuring Instrument

Ion-miller

3D Optical Profiler

Ensuring the Product Reliability

Temperature Shock Chamber x3
Temp. range: -55~150°C
Thermal shock (Switching time≤1min) : <30s

Thermal Cycling Chamber x3
Temp. range: -55~150°C
Heating/freezing rate: ≤15°C/min

High / Low Temperature & High Humidity Chamber x5
Temp. range: -55~150°C
R.H. range: 20~98% RH

High-pressure boiling testing chamber x1
Temp. range: 100~132°C
R.H. range: 100% R.H.
Pressure: <5atm

Vibration table x1
10000kgf max force; 2~2500Hz frequency, 2m/s max speed

Salt Spray Test device x1
According to ISO 9227:2017

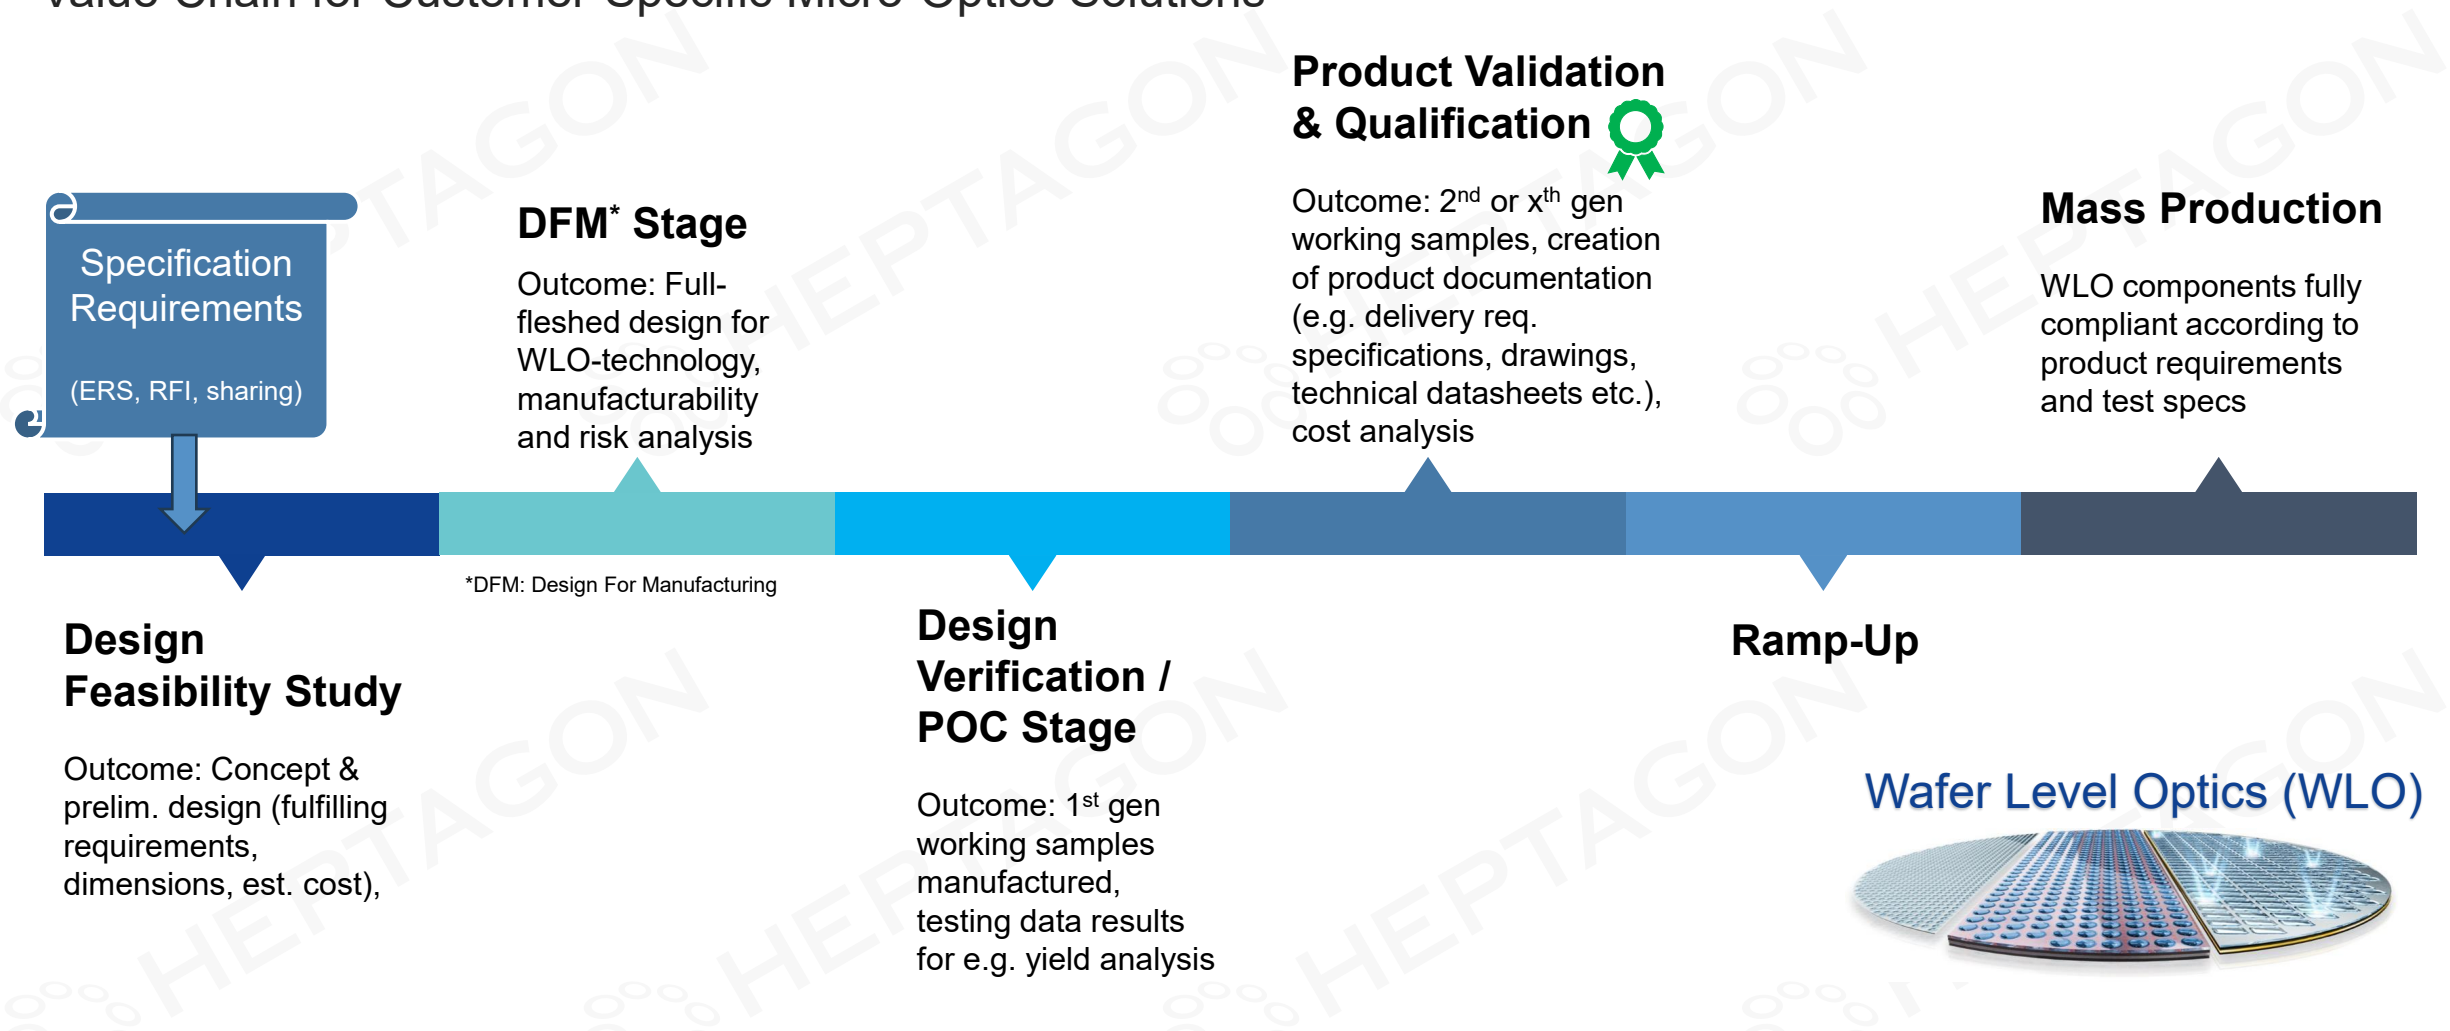

Xenon lamp aging tester x1
According to DIN 75220

Reflow Oven x1

Work with Us – From Concept to Mass Production

Value Chain for Customer-Specific Micro-Optics Solutions

In-House Skills and Capabilities, Delivering Concepts, Design using DFM Development Cycle and Testing
Ensuring high volume manufacturing, with reliability delivering proven Quality

Work with Us – From Concept to Mass Production

Full-Scale Capabilities for the Whole Process

In-House Optical & Mechanical Design

- Location: Switzerland
- Ray trace and wave optics
- Full CAD capacity
- Physics simulation
- Single-Element to Full System Designs

Mastering & Tooling

- Master in-house and 3rd party
- Tooling: in-house
- Locations: Singapore and Switzerland
- Wide range of micro- and nano-structures possible

In-House Wafer Rep., Stacking and BE Process

- Location: Singapore
- Epoxy on glass, multiple materials options available
- Capacity for high volume production of micro-optics

In-House Optical & Final Testing

- Location: Singapore
- High UPH
- Wafer level, unit level, and module level testing with standard and customized systems

In-House Vertically Integrated Capability: Design, Development, Manufacturing, Reliability and Optical Test

1

Based on the available technical capabilities, we provide our **product portfolio** (standard, customizable) or pure custom **Heptagon designs**.

The customer can then integrate these **Heptagon products** into their application solutions.

2

Based on the available technical capabilities, we cooperate with the customer, provide our **foundry service** to convert **customer's designs** into mass produced products.

These products will then be the **customer's own products**.

Both business models (products and foundry service) share the same technology base, yet they power the customer's business in different ways.

Summary

- **30+ Years of Optical Design & Simulation + Volume Production Expertise**
- **Advanced & Unique Wafer-level-Technologies to Provide Various Optical Solutions**
- **Reliable, Stable Quality + High Precision Products for Various Applications**
- **Fast Response + Customized Service Available**

Your committed and reliable long-term partner in photonics application solutions

THANK YOU
